gocanvas

GoCanvas is a cloud-based software service that lets you replace expensive and time-consuming paper forms with customizable mobile apps for smartphones and tablets. The best part? No programming or IT is required.

GoCanvas helps your employees easily collect information using their mobile devices and then share that information, which easily integrates with your existing back-end systems. GoCanvas also offers 14,000+ prebuilt, fully customizable apps that work on most mobile platforms and serve more than 30 vertical markets.

Key advantages of GoCanvas

- Replace expensive and inefficient paper forms in minutes with electronic forms available on your smartphones and tablets.
- Collect information and analyze data in real time using your mobile devices.
- Share data securely in the cloud with your customers and colleagues.
- Capture images and signatures that allow your field workers to submit detailed punch lists and work orders with sign-off.
- Document which locations require work with GPS stamping.
- Maintain compliance with government regulations, such as HIPAA.

How GoCanvas works

You may customize each GoCanvas app to fit your business. You can also include features like GPS, image capture, dispatch, barcode scanning, electronic signatures, push notifications and more. Plus, your workers get mobile access to important business data, such as parts catalogs, price lists and patient records, to help them do their jobs.

> **By using the GoCanvas mobile app solution, the process of creating and submitting field reports that used to take several days now can be done in 30 minutes, significantly improving the efficiency of our mobile workforce, cash flow and customer satisfaction.**
>
> Craig Daley, president, Daley's Drywall

Benefits

- **Fast deployment without the need for IT.** With GoCanvas as your mobile app platform, you can get up and running quickly without the need for special programming skills or IT involvement. And each time you want to make a change or update, you can easily build or customize an app.

- **Functionality across most mobile platforms.** Build or customize an app through the GoCanvas App Builder, and then it's readily available to your users on all major platforms (Android,™ iOS, BlackBerry,® Windows®

Phone and Windows Desktop). Now you're no longer required to develop a custom app for each platform, wasting valuable time and resources. And you don't need to get IT involved every time you want to make a change.

- **Robust user management.** Using the Web portal, you can easily create and manage user groups for different departments or business units. You can assign apps and reference data to specific groups, or control how much information your users may access.

- **Security.** GoCanvas uses SSL encryption to help ensure your data is transmitted and stored securely. The HIPAA compliance mode gives an additional layer of security. This includes automatic logoffs, a "disable saved passwords" feature and forced reauthentication of clients.

- **Data integration.** With the GoCanvas application programming interface (API), it's easy to automate data exports from GoCanvas and integrate them into other back-end office systems such as customer relationship management (CRM) or enterprise resource planning (ERP) software.

Features

- **Signature capture.** Accept customer signatures on your mobile devices to confirm package receipt or sales orders.

- **Image capture.** Easily verify shipping contents and conditions with pictures.
- **Calculations.** Generate more accurate estimates and work orders with a built-in calculator.
- **GPS.** Know where your equipment or product is at any moment with GPS capture.
- **Barcode scanning.** Quickly look up equipment or inventory lists from the field or the sales floor.
- **Dispatch.** Send workers new assignments and job locations on the fly.
- **Upload a database.** Easily add customer or product lists, accounting codes and other data into your GoCanvas apps.
- **Web services.** Integrate your mobile apps with back-end databases. GoCanvas works with ERP, CRM and other financial systems, such as QuickBooks.®
- **My GoCanvas.** Give your customers easy and secure personal data storage in the cloud and export this data into various file formats. Plus, you can integrate asset information into third-party applications, such as Microsoft® System Center Configuration Manager and Web Help Desk.®

The network matters.
GoCanvas is available on America's largest 4G LTE network: Verizon Wireless.

With GoCanvas, we've saved around $40,000 on employing an admin officer. We control our business with only three full-time office staff, which is unheard of in the industry.

The Plumbing and Electrical Doctor

Why Verizon

Every business can benefit from smart alliances. That's why we've teamed with leading solution providers such as GoCanvas to promote a range of innovative solutions that can help you reach your communication goals. Plus, we provide the expertise and experience you need to help you manage your mobile solution from planning to implementation.

Choose the best network.

The service is one part of the equation for helping your business. A widely available, stable wireless network is the other. That's why it makes sense to choose America's largest, most reliable 4G LTE network: Verizon Wireless.

Of course, it also helps that you get:

• Simple, online account management.
• Secure data transmission.
• 24/7 technical support.
• Highly responsive customer support.
• Discounts that increase as your business grows.
