

Verizon and Cradlepoint deliver anywhere connectivity.

Helping enable digital transformation with enterprise-grade wireless WAN Edge solutions.

Secure, reliable, and flexible network access has become more critical to business success than ever before. Demands on networks have been increasing steadily, and the global pandemic has only exacerbated the strain, accelerating a network transformation that has been trending for years. Traditionally, organizations have relied on static wired networks connecting fixed locations to a defined data center. Today, a much more fluid and agile network is needed, connected at the LTE or 5G network edge to enable new business models and support an ever-expanding set of use cases.

Challenges organizations face:

- Ensuring high availability for critical sites, applications or existing SD-WAN infrastructures.
- Traditional wired broadband connectivity can be cost-prohibitive or take months to deploy.
- Enabling Day-1 connectivity for temporary or remote locations.
- Vehicles need to be fully connected for efficiency, safety and responsiveness.

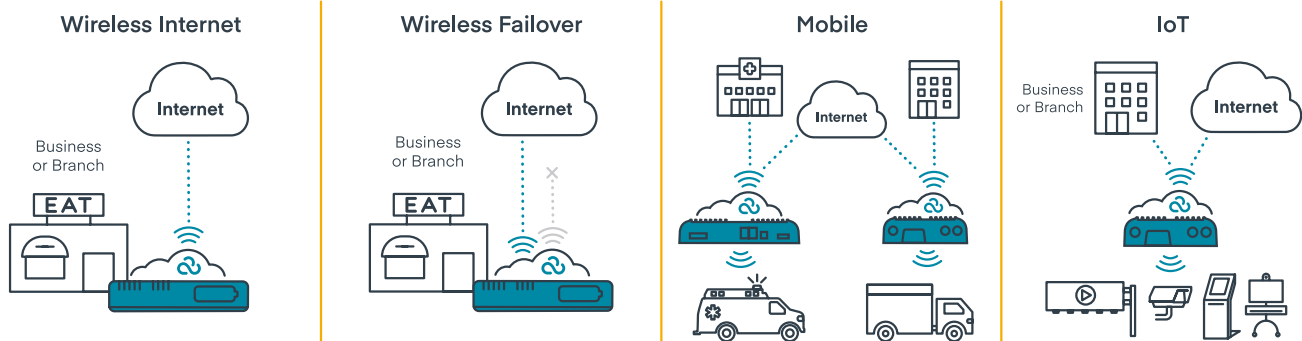

- Ensuring secure, reliable broadband connectivity to work-at-home employees or students.
- Running wires to new and remote locations to support thousands of IoT devices.

The Solution: Verizon and Cradlepoint

Verizon and Cradlepoint are global leaders in subscription-based Wireless WAN Edge solutions that combine cloud, security, and software-defined networking. Verizon's connectivity, whether 5G, LTE Business Internet or LTE Vehicle Internet packages paired with Cradlepoint wireless routers, provide an alternative to wired broadband internet service.

With Verizon 5G Business Internet, you can expect speeds up to 400 Mbps along with low latency – and that can help propel your organization's digital transformation. It can also foster agility with simple, rapid setup of new branches and mobile locations.

Cradlepoint's complete portfolio of enterprise-class 5G and 4G LTE wireless routers and wideband adapters are purpose-built to help address all-in-one connectivity options for nationwide branches, retail locations, in-vehicle networks and IoT devices – all powered by the Verizon network.

Our joint solutions also can support the needs of Federal, State and local government agencies as well as K-12 and higher education.

Empower your organization with:

- All-in-One connectivity
- Business continuity or failover
- Day-1 connectivity
- Store-in-a-Store or temporary sites
- Verizon vehicle internet
- Internet of things
- Private cellular networks

Verizon and Cradlepoint: Partners for your success.

Verizon and Cradlepoint are both industry leaders in connecting people, places and things virtually everywhere. Verizon's network has been ranked as America's most reliable by RootMetrics® US National RootScore® Report: 1H 2021. Frost and Sullivan has rated Cradlepoint as the demonstrated leader for 5G enterprise-grade edge solutions in 2020.

Verizon and Cradlepoint are well positioned to unlock the power of LTE Business Internet, LTE Vehicle Internet, and 5G technology with enterprise-grade Wireless WAN solutions.

Cradlepoint delivers a complete portfolio of connectivity and continuity solutions that leverage the coverage of Verizon 5G Nationwide and the high performance of Verizon 5G Ultra-Wideband. Our joint solutions are secure, simple to deploy and operate and deliver wireline-like quality of experience – helping enable cellular wireless to become essential WAN infrastructure.
