**Network Changes and Trunk Rearrangements:**

The Deerpark NY CS2k switch will be the recipient office of traffic migrated from the Smithtown NY DMS switch. Traffic bound for the codes listed in Table B will be delivered via the BRWDNYBWGT0 Deerpark DPG0T Tandem (DRPKNYDPG0T intra-lata SHA / DRPKNYDPG0T inter-lata FG Access SHA).

After all traffic is migrated off the Smithtown NY DMS switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Deerpark NY CS2k switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Smithtown NY DMS switch will be required to reposition the codes to the Deerpark NY CS2k switch.

All ASRs for the Deerpark NY CS2k switch must be received no later than May 1, 2025, to provide sufficient time to migrate the traffic described above. All traffic must be moved by July 2, 2025.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Smithtown NY DMS switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
