Network Changes and Trunk Rearrangements:

The Market PA C20 switch will be the recipient office of traffic migrated from the Trinity PA EWSD switch. Traffic bound for the codes listed in Table B will be delivered via the Market 90T Tandem (PHLAPAMK90T).

After all traffic is migrated off the Trinity PA EWSD switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Market PA C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Trinity PA EWSD switch will be required to reposition the codes to the Market PA C20 switch.

All ASRs for the Market PA C20 switch must be received no later than July 15, 2025, to provide sufficient time to migrate the traffic described above. All traffic must be moved by October 1, 2025.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Trinity PA EWSD switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
