### Network Changes and Trunk Rearrangements:

The Oakland PA CS2K switch will be the recipient office of traffic migrated from the Washington PA 5ESS switch. Traffic bound for the codes listed in Table B will be delivered via the Oakland GT0 Tandem (PITBPAOKGT0).

After all traffic is migrated off of the Washington PA 5ESS switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Oakland PA CS2K

switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Washington PA 5ESS switch will be required to reposition the codes to the Oakland PA CS2K switch.

All ASRs for the Oakland PA CS2K switch must be received no later than December 12, 2025, to provide sufficient time to migrate the traffic described above. All traffic must be moved by January 6, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Washington PA 5ESS switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
