Network Changes and Trunk Rearrangements:

The Newton MA C20 switch will be the recipient office of traffic migrated from the Dedham MA DMS100 switch. Traffic bound for the codes listed in Table B will be delivered via the Newton MA Tandem (NWTNMAWA01T intra-Lata SHA / NWTNMAWA01T inter-Lata FG Access SHA).

After all traffic is migrated off of the Dedham MA DMS100 switch, it will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Newton MA C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Dedham MA DMS100 switch will be required to reposition the codes to the Newton MA C20 switch.

All ASRs for the Newton MA C20 switch must be received no later than July 1, 2026, to provide sufficient time to migrate the

traffic described above. All traffic must be moved by July 29, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Dedham MA DMS100 switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
