Network Changes and Trunk Rearrangements:

The New Brunswick NJ C20 switch will be the recipient office of traffic migrated from the Eatontown NJ 5ESS switch. Traffic bound for the codes listed in Table B will be delivered via the New Brunswick 04T Tandem (NBWKNJNB04T).

After all traffic is migrated off of the Eatontown NJ 5ESS switch, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the New Brunswick NJ C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Eatontown NJ 5ESS switch will be required to reposition the codes to the New Brunswick NJ C20 switch.

All ASRs for the New Brunswick C20 switch must be received no later than August 11, 2026, to provide sufficient time to migrate the traffic described above. All traffic must be moved by August 28, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs

subject to the retirement of the Eatontown NJ 5ESS switch.
