Network Changes and Trunk Rearrangements:

The Pleasantville NY DMS switch will be the recipient office of traffic migrated from the Mount Kisco NY 5ESS switch. Traffic bound for the code listed in Table B will be delivered via the White Plains 08T Tandem (WHPLNYWP08T intra-lata SHA / WHPLNYWP08T inter-lata FG Access SHA).

After all traffic is migrated off of the Mount Kisco NY 5ESS switch, this switch will be retired and removed from the network. CLECs, IXCs, IECs, wireless carriers and paging carriers will need to secure new trunk groups built to the Pleasantville NY DMS switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunk (DEOT) with access connectivity in the Mount Kisco NY 5ESS switch will be required to reposition the codes to the Pleasantville NY DMS switch.

All ASRs for the Pleasantville NY DMS switch must be received no later than August 1, 2026, to provide sufficient time to migrate the traffic described above. All traffic must be moved by August 28, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Mount Kisco NY 5ESS switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.
