Subject : Verizon Partner Solutions Industry Letter: Parkville MD DMS100 Switch Retirement

PLEASE NOTE:

All references to the Parkville MD DMS100 switch are associated with CLLI code PKVLMDPKDS0 and will not be repeated throughout this letter.

All references to the Annapolis MD C20 switch are associated with CLLI code ANNPMDANPS1 and will not be repeated throughout this letter.

As set out in the Verizon Maryland LLC Short Term Public Notice Under Rule 51.333(a), dated July 16, 2026, on or after August 29, 2026, the Parkville MD DMS100 switch will be retired and removed from the Verizon network.

General Information: The Parkville MD DMS100 switch will be replaced by the Annapolis MD C20 switch. See details in Table A.

Table A

Description	From	To
Office Name	Parkville	Annapolis
CLLI Code	PKVLMDPKDS0	ANNPMDANPS1
Switch Type	DMS100	C20
Location	3034 Putty Hill Avenue Parkville, MD 21234	9 Northwest Street Annapolis, MD 21401
Point Code	246 192 022	246 192 002
NXX Type	EOC	EOC
OCN	9212	9212
Rate Center	238	238
LATA		

Rate Center Parkville Annapolis

State MD MD

The Exchange Codes (NXXs) in Numbering Plan Areas (NPAs) 410 and 443 currently residing in the Parkville MD DMS100 switch will be rehomed upon decommissioning of the switch and reflected in the Local Exchange Routing Guide (LERG) on or after August 28, 2026. See details in Table B.

Table B

NPA	NXX	TYPE	RATECENTER
410	661	EOC	PARKVILLE
410	663	EOC	PARKVILLE
410	665	EOC	PARKVILLE
410	668	EOC	PARKVILLE
410	882	EOC	PARKVILLE
443	998	EOC	PARKVILLE

Network Changes and Trunk Rearrangements:

The Annapolis MD C20 switch will be the recipient office of traffic migrated from the Parkville MD DMS100 switch. Traffic to be migrated to the Annapolis MD C20 switch includes all of the traffic currently handled by the Parkville MD DMS100 switch including, but not limited to, Inter-LATA access traffic (including Feature Group B and D traffic), and Intra-LATA and local traffic (including CLEC, IEC, wireless carrier and Verizon sector end office switched traffic). After all traffic is migrated off of the Parkville MD DMS100, this switch will be retired and removed from the network.

CLECs, IXCs, IECs, ILEC, wireless carriers and paging carriers will need to provision new trunk groups built to the Annapolis MD C20 switch or have existing trunk groups to that switch augmented if necessary. Carriers that have direct end office trunks (DEOT) with access connectivity in the Parkville MD DMS100 switch will be required to reposition the codes to the Annapolis MD C20 switch.

All ASRs for the Annapolis MD C20 switch must be received no later than **August 8, 2026**, to provide sufficient time to migrate the traffic described above. All traffic must be moved on or after **August 28, 2026**, based on LERG change notification.

Upon decommissioning of the Parkville MD DMS100 switch, the six (6) native codes (NPA NXXs) that currently reside in the Parkville MD DMS100 switch will reflect the Annapolis MD C20 switch in the LERG.

Submission of disconnect ASRs to Verizon for the Parkville MD DMS100 switch are required immediately after the re-homing of traffic is complete.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXXs subject to the retirement of the Parkville MD DMS100 switch.

For inquiries related to the proposed network reconfiguration, or to arrange a meeting with Verizon Network Engineering and Planning personnel, please contact your Verizon Account Manager.

We look forward to working with your team to enable uninterrupted service during the network redesign and transitioning of your traffic.
