Network Changes and Trunk Rearrangements:

The Newton, MA C20 switch will be the recipient office of traffic migrated from the Shrewsbury, MA DMS100 switch. Traffic bound for the codes listed in Table B will be delivered via the Newton, MA Tandem (NWTNMAWA01T intra-Lata SHA / NWTNMAWA01T inter-Lata FG Access SHA).

After all traffic is migrated off of the Shrewsbury, MA DMS100 switch, it will be retired and removed from the network.

CLECs, IXCs, IECs, wireless carriers, and paging carriers will need to secure new trunk groups built to the Newton, MA C20 switch or have existing trunk groups to that switch augmented. Carriers that have direct end office trunks (DEOT) with access connectivity in the Shrewsbury, MA DMS100 switch will be required to reposition the codes to the Newton, MA C20 switch.

All ASRs for the Newton, MA C20 switch must be received no later than August 1, 2026 in order to provide sufficient time to migrate the traffic described above. All traffic must be moved by August 28, 2026.

Please adhere to industry standards using normal procedures that pertain to updates and changes to the LERG for all NXX codes subject to the retirement of the Shrewsbury, MA DMS100 switch.
