# Building a platform for smarter government

Citizens, business owners and internal employees have higher expectations for state and local governments than ever before, but government organizations can struggle to meet them. State and local agencies need smarter technology and operations to be as productive, efficient and innovative as possible.

Verizon Wireless solutions work together to establish a smart government ecosystem which connects infrastructure, people and intelligence. And Verizon Wireless makes it easier and more cost-effective to implement smart government tools by making these solutions available through the National Association of State Procurement Officials (NASPO) ValuePoint® cooperative purchasing contract.

See how you can start on your journey to a smarter government:

Smart infrastructure

Intelligent Lighting
Lower operational costs and improve public safety by managing, monitoring and controlling street lighting remotely.

Traffic Data Services
Use deidentified cellular network records to analyze historical and up-to-the-minute population movement to minimize congestion and plan development.

Parking Optimization
Optimize parking for additional revenue and reduce congestion.

Telematics Fleet Tracking and Management
Track vehicles, optimize routing and control costs.

ThingSpace (IoT management)
Simplify development and management of your Internet of Things (IoT)/machine-to-machine devices.

Smart communications

One Talk
Use a single phone number across mobile and desk phones so staff can be reached regardless of their location or the device they're using.

Push to Talk Plus
Just push a button to connect instantly and securely with one or many.

Digital Signage
Target public safety messages, raise awareness and engage citizens and visitors.

NetMotion (mobile VPN)
Make sure mobile employees can connect to applications reliably wherever they are—even when coverage is spotty.

GoCanvas
Replace paper forms with mobile apps to simplify data collection, streamline operations and boost productivity.

Field Force Manager
Help mobile teams stay in touch and on track; simplify workforce administration.

Smart mobile security

Verizon Mobile Device Management (MDM)
Track and manage all the mobile devices and operating systems connecting to your network from a single unified portal.

MobileIron
Become truly mobile with a foundation to manage standards-based security across the mobile-cloud ecosystem.

IBM MaaS360
Simplify how you manage mobile devices, applications, security, data and connectivity.

Samsung Knox
Use the industry's latest mobile devices to increase productivity, enhance collaboration and strengthen device security.

Smart response

Intrepid Networks
Help shorten response times and improve safety.

Public Safety Applications
Verizon's extensive ecosystem of public safety apps includes smart solutions related to response connectivity and prioritization (e.g., Responder Private Core), response operations (e.g., OneTalk, Push to Talk and Intrepid Networks), and response devices and equipment (e.g., Fleet Management).
