

Leak detection

Experience superior leak detection for proactive damage control.

Verizon Condition Based Maintenance solutions

Solution brief

Verizon's leak detection solution is designed to alert you when a leak is present in your facility and direct you to its exact location. We combine sensor hardware, LTE connectivity and our cloud software-as-a-service (SaaS) platform to provide an end-to-end approach that delivers improved safety and damage prevention.

Maintain the safety and efficiency of your facility, systems and spaces.

Our solution continuously monitors for leaks in your facility's plumbing or industrial systems, alerting you promptly when a leak is detected. This allows you to fix any leaks quickly and efficiently before they turn into costly and damaging problems—helping prevent accidents and damage to your property or equipment.

Identify warning signs quickly.

Our leak detection solution sends alerts via text message or email when a sensor detects leaks that may lead to serious problems for your business.

- **24/7 monitoring.** Monitor for leaks virtually anytime, anywhere, on any device.
- **Prompt notifications.** Receive near-real-time alerts when a problem is detected.
- **Valuable insights.** Analyze trends with custom dashboards and reports.
- **Increased efficiency.** Save time and money by correcting problems before they cause product loss or damage.
- **Robust compliance.** Facilitate safety, quality and compliance with data logging and reports.

Take control through a single pane of glass.

Our solution includes a custom dashboard with detailed key performance indicators and sensor visualizations accessible remotely via Verizon's asset management and monitoring SaaS platform.

Don't let leaks ruin your property or business.

Enjoy a simple, out-of-the-box experience.

This turnkey solution features software that interacts with Verizon or third-party sensors to take readings at set intervals and transmit them to the cloud via an Internet of Things (IoT) gateway, giving you an easy, all-in-one monitoring experience.

Remote monitoring

Automatic data logging

Timely alerts

Analytics & reporting

Be confident that your facility, systems and spaces are monitored for leaks around the clock.

Why Verizon?

Verizon's Condition Based Maintenance remote monitoring solutions leverage a simple, intuitive platform and seamless integration with our network to help you keep your operations running smoothly and effectively. Our award-winning network offers broad coverage, fast speeds and reliable connections. So connect and stay on top of what matters most with the help of a trusted partner—Verizon.

Get award-winning network performance from Verizon, the network America relies on.

Who can benefit?

Verizon's leak detection solution enables you to monitor storage tanks, pipes and other assets for leaks and other issues. It can be useful for a wide range of industries, including:

- **Manufacturing.** Help prevent accidents, reduce environmental impact and improve safety at chemical and pharmaceutical facilities.
- **Food and beverage.** Avert product loss, improve efficiency and reduce costs.
- **Oil and gas.** Reduce environmental impact and improve safety by preventing spills and other accidents.
- **Water and wastewater.** Help prevent water waste, reduce costs and improve efficiency.

Overall, any industry that relies on pipelines, storage tanks or other assets that are at risk of leaks can benefit from our leak detection solution.
