

Let's get started.

Verizon Business Internet Gateway

Scan the QR code for step-by-step instructions, or go to set.up.verizon.com/businessinternetgateway4

1 Attach the external antennas.

Connect the six external antennas to the appropriate ports on the Gateway. Ensure the labels on the port match those on the antenna for Wi-Fi or 4G/5G. Please ensure the antennas are securely screwed in for optimal performance as illustrated.

2 Pick a location.

Place your Gateway in an open area on an elevated surface near a window.

3 Power on the Gateway.

Connect the power cord to the  port and plug the other end into the outlet. Press the power button located on the back of the device to power on the device.

4 Wait for it to start up.

Look for the indicator lights on the top of the Gateway. When the Status, Signal and Wi-Fi indicator lights are solid white, you are connected. This may take up to 15 minutes while the lights flash white or red.

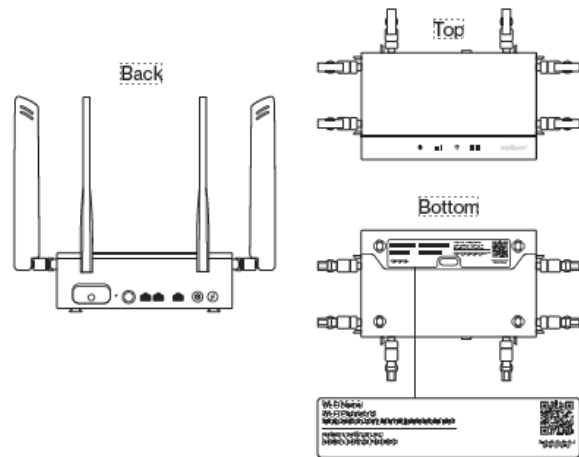

5 Connect to the Gateway.

Connect your devices using the QR code or the Wi-Fi Name and Wi-Fi Password (case sensitive) on the bottom of the Gateway.

Support and more.

Go to verizon.com/businessinternetportal to help you:

- Change Wi-Fi name and password
- Reboot Gateway(s)
- Run a speed test
- View devices connected to the Gateway
- Find general information such as IMEI, MDN and more

Need help?

For assistance, call **800.922.0204** and enter the Verizon wireless number associated with your Internet Gateway. This number is the Mobile Number from your order confirmation email or packaging slip. Alternatively, you can enter the IMEI which can be found on the bottom of the Gateway.
